

Associate in Applied Science

Accounting and Finance (A25800)

Overview

The Accounting and Finance curriculum is designed to provide students with the knowledge and skills necessary for employment and growth in the accounting or the finance profession. Accountants and finance professionals responsibilities include assembling, analyzing, recording, investigating, interpreting and communicating essential information about financial operations of businesses and government entities.

Course work may include accounting, finance, fraud examination, forensic and cybersecurity, ethics, business law, computer applications, financial planning, government accounting, insurance, marketing, real estate, selling, and taxation providing the student with a comprehensive understanding of the industry. Related skills are developed through the study of communications, computer applications, financial analysis, fraud investigations, critical thinking skills, and ethics.

Graduates should qualify for entry-level accounting and finance positions in many types of organizations including accounting firms, small businesses, manufacturing firms, banks, hospitals, school systems, and governmental agencies.

Advancement in the accounting and finance profession is realized with work experience and additional education. For more information, call the Business and Accounting Division office at 704.330.4865.

Employment Outlook

Graduates should qualify for entry-level accounting and finance positions in many types of organizations including accounting firms, small businesses, manufacturing firms, banks, hospitals, school systems, and governmental agencies.
