

Associate in Applied Science **Business Administration (A25120)**

Overview

The Business Administration curriculum is designed to introduce students to the various aspects of the innovation-driven economy. Students are provided with a fundamental knowledge of business functions, processes, and an understanding of business organizations in today's global economy. Course work includes business concepts such as human resources, business law, global business, personal finance, marketing, and management.

Skills related to applying these concepts are developed through the study of computer applications, decision-making, team building, case study, and communication. Through these skills, students gain a sound business education base for lifelong learning. Graduates are prepared for employment opportunities in government agencies, financial institutions, and large to small businesses or industries.

Employment Outlook

Graduates are prepared for employment opportunities in government agencies, financial institutions, and large to small businesses or industries.
