

Associate in Applied Science

Cardiovascular Technology (A45170)

Agnes Binder Weisiger Cardiovascular Technology

Overview

The Cardiovascular Technology curriculum prepares individuals to develop attributes necessary to perform procedures leading to the diagnosis and treatment of cardiovascular disease. Coursework emphasizes technical and cognitive skills including echocardiography, exercise stress testing, electrocardiography, cardiac catheterization, blood gases, electrophysiology, and cardiovascular anatomy and physiology.

Employment Outlook

Graduates selecting the non-invasive track (Cardiac Sonography) qualify for the Registered Diagnostic Cardiac Sonographer (RDCS) credential through ARDMS or Registered Cardiac Sonography (RCS) through CCI. Invasive track graduates may pursue Registered Cardiovascular Invasive Specialist (RCIS) credentials through CCI. Graduates may work in hospitals, clinics, and cardiology offices.

Plan of Study

CREDITS

Term I

ICT 110 Invasive Fundamentals	3
NCT 134 Cardiovascular Anatomy and Physiology	4
ICT 113 Electrocardiography	4
Basic Anatomy & Physiology or Anatomy and Physiology I (BIO 163 or BIO 168)	5
Survey of Medical Terminology or Medical Terminology I (MED 120 or MED 121)	2
ACA 122 College Transfer Success	1
<i>Invasive track</i>	
Term Credits	19

Term II

ICT 136 Cardiac and Peripheral Vascular Invasive I	6
ICT 140 Cardiovascular Hemodynamics I	2
ENG 111 Writing and Inquiry	3
Conceptual Physics or College Physics I (PHY 110/110A or PHY 151)	4
Mathematics elective (MAT 143, MAT 152, or MAT 171)	3
Term Credits	18

Term III

ICT 214 Cardiac and Peripheral Vascular Invasive II	9
ICT 218 Invasive Pharmacology	2
PSY 150 General Psychology	3
Writing elective (ENG 112 or ENG 114)	3
Term Credits	17

Term IV

ICT 234 Cardiac and Peripheral Vascular Invasive III	13
ICT 236 Cardiovascular Hemodynamics II	2
Humanities/Fine Arts elective	3
Term Credits	18

Total Credit Hours
