

Diploma

Dental Assisting (D45240)

Overview

The Dental Assisting curriculum prepares individuals to assist the dentist in delivering dental treatment and function as integral members of the dental team while performing chairside and related office and laboratory procedures. Instruction encompasses general studies, biomedical sciences, dental sciences, clinical sciences, and clinical practice through lecture, laboratory, and clinical experiences. Students gain knowledge in infection/hazard control, radiography, dental materials, preventive dentistry, head and neck anatomy, dental and medical emergencies, and clinical procedures.

Employment Outlook

Graduates may qualify for the Dental Assisting National Board Examination to become Certified Dental Assistants and work as Dental Assistant II (per North Carolina Dental Laws) in dental offices and related settings.

Plan of Study
