

Associate in Applied Science

Dental Hygiene (A45260)

Overview

The Dental Hygiene curriculum prepares individuals to assess, plan, implement, and evaluate dental hygiene care for the individual and the community. Students develop competencies in patient assessment, care planning, oral hygiene instruction, radiographic imaging, and preventive therapy. The program emphasizes electronic patient management systems and procedures within dental hygiene scope of practice.

Employment Outlook

Graduates qualify to pursue national and state licensure examinations required for practice. Career opportunities span dental offices, hospital clinics, schools, public health agencies, and educational institutions.
