

Associate in Applied Science

Emergency Medical Science (A45340)

Overview

The Emergency Medical Science curriculum prepares graduates for careers as entry-level paramedics. The curriculum encompasses basic and advanced life support knowledge and skills through classroom, laboratory, and hospital clinical instruction at a regional Level One trauma center. Field internship occurs at a major EMS provider. The core focus includes EMS management, rescue operations management, and EMS education methods, providing leadership experience.

Employment Outlook

Upon completion, students qualify for North Carolina and National Paramedic certification exams. Employment prospects include EMS agencies, fire and rescue, critical care transport, special events, and government positions.
