

Associate in Applied Science

Pharmacy Technology (A45580)

Overview

The Pharmacy Technology curriculum prepares individuals to assist the pharmacist in duties that a pharmacy technician can legally perform within prescribed boundaries. Students engage with healthcare and pharmaceutical principles, emphasizing the pharmacy technician as a member of the interdisciplinary team providing safe, individualized care. Work includes prescription preparation, intravenous solution mixing, patient profile management, inventory maintenance, medication packaging, and data gathering for drug therapy monitoring.

Employment Outlook

Graduates qualify to pursue Pharmacy Technician Certification Board (PTCB) certification. Employment opportunities span retail, hospitals, nursing homes, research laboratories, and pharmaceutical manufacturing facilities.
