

Associate in Applied Science

Respiratory Therapy (A45720)

Overview

The Respiratory Therapy curriculum prepares individuals to function as professional respiratory therapists, performing diagnostic tests, physical exams, treatments, patient and family education, assisting physicians with procedures, and managing patients with heart and lung diseases. Students develop competencies in treating cardiopulmonary conditions through assessment, life support, monitoring, and drug administration involving patients of all ages in various settings including emergency room, critical care, and general floor.

Employment Outlook

Upon completion, graduates qualify for the Therapist Multiple-Choice Examination and Clinical Simulation Examination administered by the National Board for Respiratory Care. Employment opportunities exist in acute and long-term care hospitals, clinics, physician offices, nursing homes, education, industry, and home care.
