

Associate in Applied Science Artificial Intelligence (A25710)

Overview

Artificial intelligence is transforming every industry—and this program puts you at the heart of it. You'll learn to build intelligent systems that make predictions, recognize images, understand language, and learn from data, using the same Python tools and machine-learning techniques powering today's most innovative companies.

Through hands-on courses in machine learning, deep learning, chatbots, and computer vision—grounded in applied math, statistics, and ethics—you'll move from your first Python program to training and deploying real AI models, building portfolio-ready skills with no prior experience required. The AAS in Artificial Intelligence degree readies you for one of technology's fastest-growing fields.

Employment Outlook

The opportunities in AI are exploding. The U.S. Bureau of Labor Statistics projects employment for data professionals to grow at least 38% by 2030, and in the Charlotte region—a major financial and technology hub—employers across banking, healthcare, and tech are investing heavily in AI talent, driving strong demand and competitive salaries for graduates who can build and maintain these systems.

Your degree can open doors to roles like AI Engineer, Machine Learning Engineer, Data Scientist, Computer Vision Engineer, NLP Engineer, and AI Research Scientist.

(Please note: CPCC does not guarantee employment)

Plan of Study

CREDITS

Term I

ACA 122 Transfer & Career Success	1
CSC 113 Artificial Intelligence Fundamentals	3
ECO 251 Principles of Microeconomics	3
ENG 111 Writing and Inquiry	3
MAT 152 Statistical Methods I	4
Term Credits	14

Term II

ART 111 Art Appreciation	3
CSC 121 Python Programming	3
CTS 210 Computer Ethics	3
CTS 285 Systems Analysis & Design	3
MAT 171 Precalculus Algebra	4
Term Credits	16

Term III

CSC 112 Machine Learning Computation	3
ENG 112 Writing and Research in the Disciplines	3
MAT 263 Brief Calculus	4
<i>You may have completed program certificate C25710-C1. Confirm eligibility with your academic advisor.</i>	
Term Credits	10

Term IV

CSC 114 Artificial Intelligence I	3
CSC 115 Machine Learning I	3
CSC 128 Chatbot Programming I	3
CSC 162 Computer Vision	3
CSC 221 Advanced Python Programming	3
Term Credits	15

Term V

CSC 161 Deep Learning	3
CSC 214 Artificial Intelligence II	3
CSC 215 Machine Learning II	3
CSC 228 Chatbot Programming II	3
Technical Elective	1-3
Term Credits	13-15

Total Credit Hours

68-70
