

Associate in Applied Science

Cybersecurity (A25590CX)

Blue Team Career Track (Network Defense & Security)

Overview

Cybersecurity professionals protect the systems, networks, and data that organizations depend on—and demand for them in the Charlotte region has never been higher. You'll build a strong security foundation in networking, operating systems, Linux, virtualization, protocol analysis, and security concepts, then specialize in a career track.

The Blue Team track focuses on defending networks in real time—intrusion detection, network programmability, and endpoint detection and response. Coursework aligns with SSCP and Cisco CyberOps Associate certifications.

Employment Outlook

Defenders keep organizations running. Over recent years, Charlotte-area employers posted 3,880 Information Security Engineer and 2,842 Information Security Analyst roles—the threat-detection and defense skills this pathway builds—within a regional market of 17,000+ cybersecurity openings averaging nearly \$125,000.

Your degree can open doors to roles like Information Security Analyst, SOC Analyst, Intrusion Detection Specialist, Endpoint Security Engineer, and Network Defender.

(Please note: CPCC does not guarantee employment)

Plan of Study

CREDITS

Term I

ENG 111 Writing and Inquiry	3
MAT 143 Quantitative Literacy	3
CIS 110 Introduction to Computers	3
CTI 110 Information Technology Foundations	3
ACA 122 Transfer & Career Success	1
Term Credits	13

Term II

CTS 120 Hardware/Software Support	3
NOS 110 Operating Systems Concepts	3
NOS 120 Linux Single User	3
CTI 120 Network and Security Foundations	3
PHI 240 Introduction to Ethics	3
Term Credits	15

Term III

NET 125 Introduction to Networks	3
NET 126 Switching and Routing	3
SEC 110 Security Concepts	3
CTS 115 Information Systems Business Concepts	3
PSY 150 General Psychology	3
<i>You may have completed a program certificate(s). Confirm eligibility with your academic advisor.</i>	
Term Credits	15

Term IV

CCT 250 Network Vulnerabilities I	3
SEC 151 Introduction to Protocol Analysis	3
CCT 121 Computer Crime Investigation	4
SEC 175 Perimeter Defense	3
SEC 210 Intrusion Detection	3
<i>You may have completed a program certificate(s). Confirm eligibility with your academic advisor.</i>	
Term Credits	16

Term V

ENG 112 Writing and Research in the Disciplines	3
CTI 140 Virtualization Concepts	3
Technical Elective	1
NET 226 Network Programmability	3
SEC 265 Endpoint Detection and Response	3
<i>You may have completed a program certificate(s). Confirm eligibility with your academic advisor.</i>	
Term Credits	13
