

## Associate in Applied Science **Cybersecurity (A25590CX)** Digital Forensics Career Track

### Overview

Cybersecurity professionals protect the systems, networks, and data that organizations depend on—and demand for them in the Charlotte region has never been higher. You'll build a strong security foundation in networking, operating systems, Linux, virtualization, protocol analysis, and security concepts, then specialize in a career track.

The Digital Forensics track teaches you to investigate cybercrime, recover data, and analyze digital evidence—the incident-response and investigation skills that financial, healthcare, and government employers rely on, aligned with industry digital-forensics certifications.

### Employment Outlook

Charlotte's financial institutions, healthcare systems, and government agencies need professionals who can investigate breaches, collect evidence, and respond to incidents—part of a regional market of 17,000+ cybersecurity openings averaging nearly \$125,000.

Your degree can open doors to roles like Digital Forensics Investigator, Incident Responder, Cybercrime Analyst, and Forensic Analyst.

(Please note: CPCC does not guarantee employment)

### Plan of Study

CREDITS

#### Term I

|                                                   |           |
|---------------------------------------------------|-----------|
| <b>ENG 111</b> Writing and Inquiry                | 3         |
| <b>MAT 143</b> Quantitative Literacy              | 3         |
| <b>CIS 110</b> Introduction to Computers          | 3         |
| <b>CTI 110</b> Information Technology Foundations | 3         |
| <b>ACA 122</b> Transfer & Career Success          | 1         |
| <b>Term Credits</b>                               | <b>13</b> |

#### Term II

|                                                 |           |
|-------------------------------------------------|-----------|
| <b>CTS 120</b> Hardware/Software Support        | 3         |
| <b>NOS 110</b> Operating Systems Concepts       | 3         |
| <b>NOS 120</b> Linux Single User                | 3         |
| <b>CTI 120</b> Network and Security Foundations | 3         |
| <b>PHI 240</b> Introduction to Ethics           | 3         |
| <b>Term Credits</b>                             | <b>15</b> |

#### Term III

|                                                                                                         |           |
|---------------------------------------------------------------------------------------------------------|-----------|
| <b>NET 125</b> Introduction to Networks                                                                 | 3         |
| <b>NET 126</b> Switching and Routing                                                                    | 3         |
| <b>SEC 110</b> Security Concepts                                                                        | 3         |
| <b>CTS 115</b> Information Systems Business Concepts                                                    | 3         |
| <b>PSY 150</b> General Psychology                                                                       | 3         |
| <i>You may have completed a program certificate(s). Confirm eligibility with your academic advisor.</i> |           |
| <b>Term Credits</b>                                                                                     | <b>15</b> |

#### Term IV

|                                                                                                         |           |
|---------------------------------------------------------------------------------------------------------|-----------|
| <b>CCT 250</b> Network Vulnerabilities I                                                                | 3         |
| <b>SEC 151</b> Introduction to Protocol Analysis                                                        | 3         |
| <b>CCT 121</b> Computer Crime Investigation                                                             | 4         |
| <b>CSC 121</b> Python Programming                                                                       | 3         |
| <b>CCT 240</b> Data Recovery Techniques                                                                 | 3         |
| <i>You may have completed a program certificate(s). Confirm eligibility with your academic advisor.</i> |           |
| <b>Term Credits</b>                                                                                     | <b>16</b> |

#### Term V

|                                                                                                         |           |
